Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 20 February 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Drawings***

1. The corrected or substitute drawings were received on February 21, 2003. These drawings are acceptable.

***Claim Rejections - 35 USC § 112***

2. Rejection under 112 First and Second Paragraphs is withdrawn.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishiyama, et al. (JP 2000050584).

Nishiyama, et al. disclose a motor (Figure 7) comprising:

a rotor, comprising a plurality of first rotator portions (2), each having a permanent magnet (6), and

one second rotator portions (3), each having magnetic saliency (Abstract), said first and second rotator portions been arranged adjacent to each other in a direction of a rotating shaft (See Figure 7);

the rotator portions being separated in a direction of a longitudinal axis of a rotating shaft; and

a stator (21) which generates a magnetic field for driving said rotor when electric current

Art Unit: 2834

is supplied.

5. With regards to claim 2, Nishiyama, et al. disclose the first rotator portion and the second rotator portion not being arranged adjacent to each other. (See Figure 7)
6. With regards to claim 3, Nishiyama, et al. disclose the first rotator portion and the second rotator portion being magnetically combined.
7. With regards to claim 4, Nishiyama, et al. disclose the claimed invention wherein the second rotator portion has a shape of having a plurality of inverted-circular arc-shaped notches on a circumferential portion of a circular plate or a cylindrical column (See Figure 2 and 3), and a full or partial contour portion of said notch is provided at a position whereat said full or partial contour portion opposes to the permanent magnet.
8. With regards to claim 5, Nishiyama, et al. disclose the claimed invention wherein said first rotator portion and said second rotator portion are arranged adjacent to each other in such a manner that current phases for generating maximum torque for both the first rotator portion and the second rotator portion are in electrical phase with one another.
9. With regards to claim 6, Nishiyama, et al. disclose the claimed invention wherein the stator has a stator winding.

***Claim Rejections - 35 USC § 103***

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2834

11. Claims 7/1 – 7/6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishiyama, et al. in view of Mildice ( US 6252331).

Nishiyama, et al. teach the claimed invention as disclosed above. However, it fails to disclose an electric vehicle motor using a fuel cell as the power supply.

Mildice teaches the use of an electric vehicle drive system (motor) connected to a DC power source that could be a fuel cell.

It would have been obvious to one skilled in the art at the time the invention was made to use the fuel cell power supply in an electric vehicle as disclosed by Mildice in the motor assembly disclosed by Nishiyama, et al.

#### *Response to Arguments*

12. Applicant's arguments, see Applicant's Remarks – page 1 paragraphs 2-5 , filed on February 21, 2003, with respect to the drawings objection have been fully considered and are persuasive. The objection of the drawings has been withdrawn.

13. In response to Applicant's arguments that the art of record does not teach the features disclosed in the amended claim 1, is the examiner's position that Nishiyama et al teach in figure 7 the claimed features.

#### *Conclusion*

14. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2834

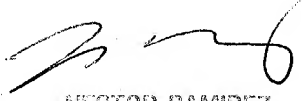

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
